

Windows touchscreen computers

Our open platform industrial touchscreen computers are pre-loaded with windows CE.net 4.2 operating system. You load the software that best suits your needs (or we can do it for you) which gives unlimited capability. Features such as Ethernet, USB, RS232/422/485 and audio outputs are also included and the software can allow multiple instruments to be connected using different protocols. Using a web browser remote supervision is possible through Ethernet/ internet lines.
